Detailed Action

Acknowledgment is made of the Preliminary Amendment filed June 4, 2003 in which applicant added new claims 30-37.

Election/Restrictions

Applicant's election of the species wherein A is an N-linked heterocyclic compound in Paper No. 10 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's state that claims 1-5, 10, 11, 14, 15, 18, 19, and 30-37 read on the species elected.

An action on the merits of claims 1-5, 10, 11, 14, 15, 18, 19, and 30-37 is contained herein below.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5, 10, 11, 14, 15, 18, 19, and 30-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite wherein it is unclear as to why the variable A is in parenthesis. The use of parenthesis around a variable represented by a single letter is not standard practice, and the examiner is unsure as to what applicants intend by the use of the parenthetical variable.

Claim 1 is indefinite wherein applicant uses confusing alternative language. Applicants recite: "D is a primary alcohol, a hydrogen, or an oxygen, nitrogen, carbon, or sulfur linked to phosphate, a phosphoryl group, a pyrophosphoryl group, or adenosine monophosphate through a phosphodiester or carbon-, nitrogen-, or sulfur-substituted phosphodiester bridge or to adenosine diphosphate through a phosphodiester or carbon-, nitrogen-, or sulfur-substituted pyrophosphodiester bridge". Does applicant intend D to optionally be a phosphoryl group? Clarity is respectfully requested.

Claim 3 is indefinite wherein the claim recites "a substituted pyridyl group" or a "substituted pyrimidyl group". In the absence of the identity of moieties which are intended to be substituted onto the pyridyl or pyrimidyl core, the identity of the moieties effectuating a modification or substitution onto the core would be difficult to ascertain. In the absence of said moieties, the claims containing the term "substituted" are not described sufficiently to distinctly point out that which applicant intends as the invention.

All claims which depend from an indefinite claim are also indefinite. *Ex parte Cordova*, 10 U.S.P.Q. 2d 1949, 1952 (P.T.O. Bd. App. 1989).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4, 10-11, and 30-32 are rejected under 35 U.S.C. 102(a) as being anticipated by Sauve et al. (Document #10 of IDS filed April 24, 2002: "A Covalent Intermediate in CD38 is Responsible for ADP-Ribosylation and Cyclization Reactions", J. of the American Chemical Society, vol. 122, no. 33, Aug. 23, 2000).

Claims 1 and 2 of the instant application are drawn to the compound of the formula:

wherein B and C are optionally H or halogen, D is optionally an O-linked to a phosphate group, and A is a N-linked heterocyclic group. Claims 3 and 4 limit A to a nicotinamide group. Claims 10-11, and 30-32 limit B and C to either of both are H or one is H and the other is halogen, amino, or thiol group.

Art Unit: 1623

Sauve et al. disclose a compound in column 2, page 7856 (ara-F-NMN⁺) which is represented by the structure:

wherein D is disclosed as being an O-linked to a phosphate group. The moiety in the A position of the instantly claimed compound is nicotinamide. The structure of Sauve et al. is seen to anticipate the instant application's claims 1-4, 10-11, and 30-32.

Claims 1-3, 10-11, 14-15, 18, 30-33, and 36 are rejected under 35 U.S.C. 102(a) as being anticipated by Von Borstel et al. (US Patent 6,103,701).

Claims 1 and 2 of the instant application are drawn to the compound of the formula:

wherein B and C are optionally H or halogen, D is optionally a phosphoryl group, and A is a N-linked heterocyclic group. Claim 3 limits A to optionally a substituted pyrimidyl group. Claims 10-11, and 30-32 limit B and C to either of both are H or one is H and the other is halogen,

Art Unit: 1623

amino, or thiol group. Claims 14, 15, and 33 limit D to a primary alcohol or H. Claims 18 and 36 are drawn to a composition comprising the compounds of claims 1 and 3 and a carrier.

Von Borstel et al. discloses a compound in column 6, formula III, represented by the structure:

wherein R is disclosed as being H or an acyl radical. The moiety at the A position of the instantly claimed compound is seen to be a substituted pyrimidinyl group. Von Borstel et al. show the compounds to be effective in compositions when combined with pharmaceutically acceptable carriers (column 22, lines 28-38). The structure and compositions of Von Borstel et al. are seen to anticipate the structures and compositions of claims 1-3, 10-11, 14-15, 18, 30-33, and 33 of the instant application.
